Thailand

Dear Sirs,

On behalf of Kawasaki Heavy Industries, Limited (KHI) we are delighted to inform Best Tech & Engineering Limited (BTE) for the excellent corporation during our works for the Suvarnabhumi International Airport Chiller Plant Project.

Moreover, BTE was in charge of the civil works, equipment installation, local piping fabrication & supply, and piping erection and commissioning works for this chiller plant of 8 units, each with capacity of 2100 USRT. The duration of this project lasted from the September 2004 to July 2005, which smoothly met the time schedule requirements. Addition to the prompt completion, BTE had kept their promises as agreed in the purchase contact—including both the prices and qualities. Importantly, the management and documentation were very organized and well recorded. With these outstanding aptitudes, we were able to assign any additional works during this project with trust and confidence.

We want to especially thank Mr. Sarawut M. (Site Manager), his staffs, and the workshop team for this great teamwork and professional spirits. BTE's hospitality for our staff, as well as our opportunity to be a part of Thai history, will always be kept in our minds. We recommend Best Tech & Engineering Limited as an utmost business partner and a true companion.

Sincerely Yours,

Yuji Kawahara
Project Manager
Chiller Plant Project for SBIA
Kawasaki Heavy Industries, Limited.
